Governance Dashboard

Streamline organization-wide accessibility efforts, and transform accessibility data into actionable insights with a centralized dashboard that connects data, teams, and experiences for data-driven governance decisions.

Build a sustainable accessibility program with policies.

Define standardized policies and metrics for your team to drive measurable results.

Monitor progress and changes across your portfolio.

Prioritize your remediation efforts with monitoring insights that drive critical accessibility improvements.

Prioritize accessibility issues by risk.

Take action to address issues with the highest number of critical issues.

Understand your most frequently identified issues.

Examine your progress and identify training opportunities and key areas for improvement.

No other platform allows accessibility program owners to set policies and centralize data from all digital properties in a single place–empowering users to take action.

Take control of accessibility with the Level Access Governance Dashboard

1 **Define policies**

Set custom values for six key policies to measure the performance of all your digital properties in a single, centralized location.

2 **Take action**

Prioritize tasks based on which properties have the highest number of critical, high, or low-priority findings and recommendations for remediation.

4 **Stay informed**

Manage your exposure to risk by staying on top of all your digital properties as they move up and down the rankings based on critical issues.

3 **Make improvements**

Access lists of the most violated success criteria across properties to make informed decisions about employee training or internal testing practices.

Whether your organization has an established accessibility program or is just beginning accessibility improvements, our Governance Dashboard makes it easy to set accessibility targets, monitor changing vulnerabilities, identify areas to improve, and demonstrate your commitment to ensuring all your digital properties are accessible.

About Level Access

Level Access is an all-in-one digital accessibility solution designed to help organizations make their digital content accessible for individuals with disabilities and compliant with global mandates.
