

Monitoring & Analytics on the Level Access Platform

Every update or change to your website can result in accessibility issues being introduced. With always-on Monitoring and Analytics, you'll have the tools to gain a complete understanding of your accessibility performance, see changes in status over time, and easily pinpoint the areas of your digital experiences that require immediate attention.

Key insights to improve accessibility health

Prioritize your remediation efforts with monitoring insights that drive critical accessibility improvements.

Navigate changes in your accessibility performance with ease

See a summary of the latest changes in your performance and quickly identify the specific areas that require immediate attention.

Easy and convenient access to all monitored web pages

Keep a pulse on all the pages you've set up for monitoring from one convenient interface.

Maximize team efficiency

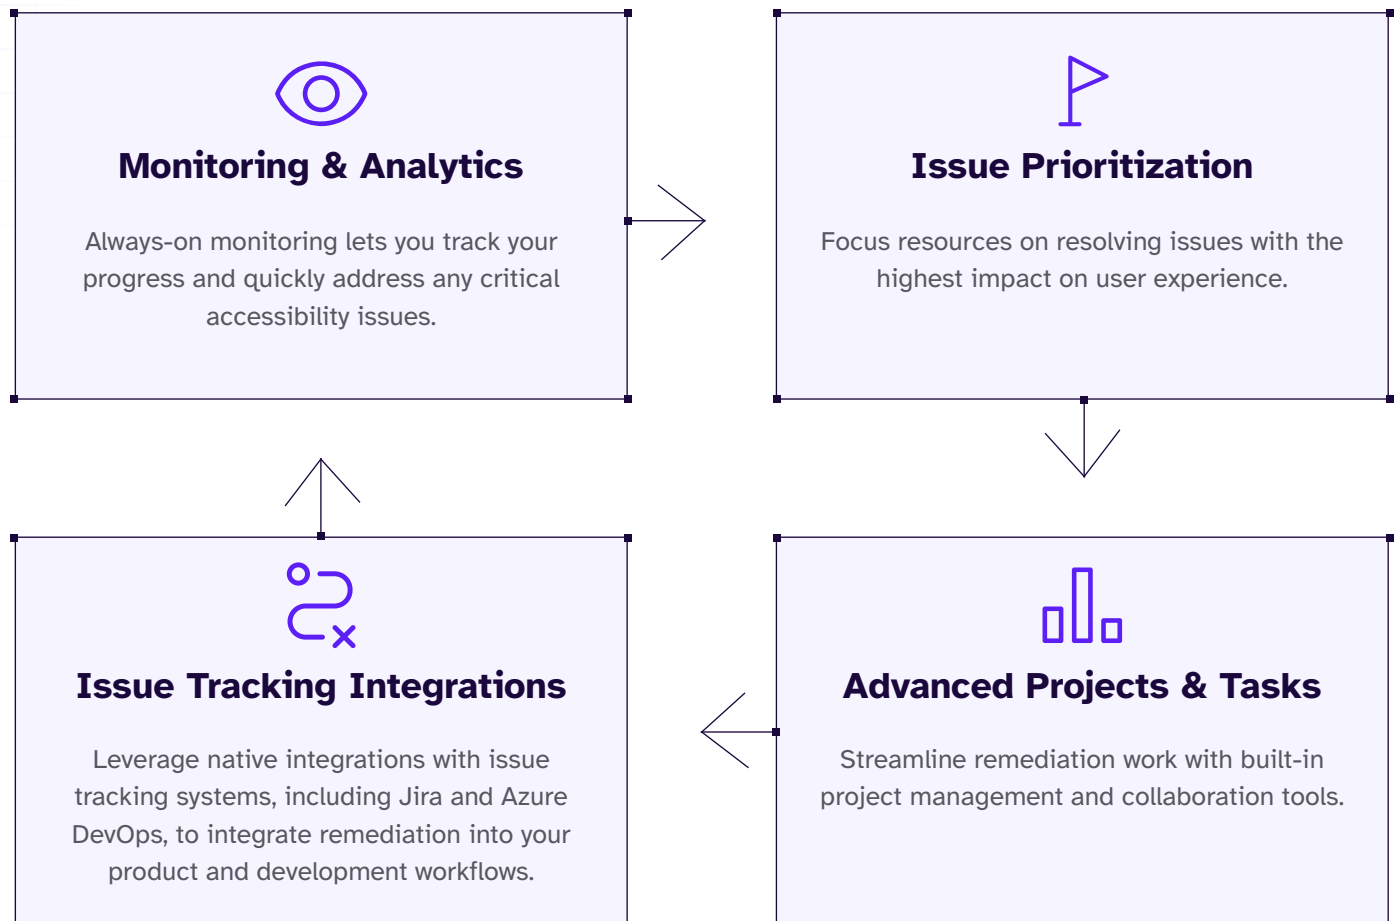

Sort, favorite, and prioritize key pages to focus your teams' efforts on resolving issues that have the highest impact on user experience.

Alerts to notify you of health score drops

Set up alerts to quickly address any critical drops to your accessibility health.

Use Monitoring & Analytics with the advanced project management capabilities of the Level Access Platform to maximize your efforts and your customers' experiences.

Stay up to date on accessibility performance

If you're ready to make efficient accessibility progress, we're ready to help. With a streamlined user interface and powerful monitoring and reporting capabilities, the Level Access Platform is your single system-of-record for tracking and understanding digital accessibility performance. Our unique combination of advanced software and expert managed services helps teams understand best practices and prioritize swiftly to create—and maintain—accessible experiences for all.
